- ☐ Critical Minerals Exposure Engine
- ☒ Sanctions Trade Finance Exposure Engine
- ☐ Cyber Business Interruption Engine

Political Risk Agent

Source-audited political risk workflow for turning public/live evidence into decision-useful commercial risk outputs.

This dashboard displays saved showcase artefacts only, it does not call Tavily or spend live-search credits.

Current showcase cases:

- UK ETS: regulatory policy into route-level carbon cost exposure
- Hormuz: geopolitical/security risk into transit, delay, reroute or legal-hold decision
- Critical Minerals: strategic competition into production-continuity risk
- Sanctions Trade Finance: sanctions/export controls into transaction approval, escalation, legal hold or rejection
- Cyber Business Interruption: geopolitical cyber and ransomware risk into downtime, notification, insurance and recovery decisions

The dashboard is designed as an expandable case portfolio. Future cases can be added using the same saved-showcase pattern.

How to read this dashboard

Step	Action
1	Start with the decision recommendation.
2	Check the model output and key trigger.
3	Review source caveats and company-data requirements before treating the result as operational.

Sanctions Trade Finance Exposure Engine: Transaction Approval, Escalation and Legal-Hold Risk

Transaction decision workflow for approve, enhanced due diligence, escalation, legal hold or rejection under sanctions, end-use, counterparty, route, payment and documentation risk.

Decision Hold/Escalate	Risk High	Confidence 3/5
Evidence Live	Provider Tavily	Fallback No
Sources 9	Legal hold Yes	Missing data 9

First-Reader Summary

Item	Value
Business problem	A trade finance transaction can become unacceptable where goods, counterparties, ownership, route, payment
Decision supported	Decide whether to approve, apply enhanced due diligence, escalate, place on legal hold or reject.
Evidence-to-output logic	Official sanctions guidance, end-use controls and source evidence are mapped to transaction red flags and c
Company data needed	Goods classification, end-user statement, counterparty screening, beneficial ownership, payment route, logi

Decision Transaction Risk Decision Engine Evidence and Sources Full Brief / Source Audit

Decision Summary

Item	Value
Decision	Legal hold or escalation until red flags are cleared
Current stance	Escalate or hold unresolved goods, ownership, route, payment or document risk
Legal trigger	Sanctioned party, prohibited end-use, unlicensed controlled goods or payment red flag
Missing data	Goods, counterparties, ownership, route, payment, licence and documents

Dashboard Summary

Item	Value
Decision engine	approve / enhanced due diligence / escalate / legal hold / reject
Current stance	Escalate or hold where goods, counterparty, ownership, route, payment or documentation red flags are un
Primary legal trigger	sanctioned counterparty, prohibited end-use, controlled goods without licence, or payment red flag
Primary commercial trigger	financing delay, documentation failure, credit exposure or insurance/underwriting exclusion
Evidence mode	Live source retrieval / saved showcase
Source provider	Tavily
Key data limits	Transaction-specific goods, counterparty, ownership, route, documents and licence data required

Decision Recommendation

Item	Assessment
Recommended decision	Legal hold where goods, end-use, licence, payment or sanctioned-party red flags remain unresolved; otherw
Current stance	Escalate or hold where goods, counterparty, ownership, route, payment or documentation red flags are unn
Approve if	Goods are non-controlled or licensed, counterparties screen clean, ownership is clear, route/payment are ac
Enhanced due diligence if	Residual uncertainty is documentable and controllable, with legal/compliance sign-off and facility conditio
Legal hold trigger	Sanctioned counterparty, prohibited end-use, controlled goods without licence, payment red flag, missing c
Reject trigger	Confirmed sanctioned counterparty, prohibited end-use, false documents, unavailable required licence or u

Scope and Specificity

This is a client-type sanctions and trade-finance exposure screen, not legal advice and not a transaction clearance decision. It models how a UK trade finance lender, bank or credit insurer should structure approval, escalation, legal-hold and rejection controls when public sanctions/export-control evidence intersects with a proposed transaction.

The output does not claim that any named borrower, buyer, vessel, bank, commodity or route is clear or prohibited. Transaction-specific use requires private deal data and legal/compliance sign-off.

Transaction Exposure Summary

Exposure channel	Current assessment	Decision implication
Goods / end-use	High in the illustrative screen because controlled goods and licence status are unreso	Legal hold until classification, end-use and l
Counterparty / ownership	Medium because public evidence cannot clear named parties or beneficial owners.	Escalate until screening and ownership evid
Route / jurisdiction	Medium with diversion and transshipment risk requiring validation.	Enhanced route and logistics checks before
Payment route	Unclear until bank/intermediary/payment path is validated.	Hold or escalate if payment red flags remain
Documentation	Weak in the illustrative screen.	Request missing documents before drawdo
